
“Reduce Carbon Emissions with an Espar Heater” Video Transcript

VIDEO DESCRIPTION:

Length 00:16 min

A truck that idles overnight will emit as much as 44,000 lbs. of carbon into the atmosphere every year, while that same truck equipped with an Espar Heater System will emit only 1,440 lbs – 96% decrease.

VIDEO TRANSCRIPT:

[Engine running sound]

“44,000 LBS; The amount of CO² emitted per truck annually through overnight idling”

[Relaxing nature sound, birds chirping]

“ESPAR HEATER”

“EQUIPPED TRUCKS EMIT 1440 LBS”

“96% LESS”
